

Autnhive Selects Oracle Cloud to Scale SAMI's AI-Driven Continuous Threat Exposure Management Platform

Oracle Cloud Infrastructure strengthens SAMI's ability to scale securely while expanding global access to its AI-driven CTEM platform.

Toronto, Canada, February 12, 2026 (GLOBE NEWSWIRE) — Autnhive Corporation™ a Canadian company and leading provider of proactive cybersecurity solutions, today announced it will run its AI-driven cybersecurity platform, SAMI (Security Assisted by Machine Intelligence), on Oracle Cloud Infrastructure (OCI). The move to OCI will enable Autnhive to provide scalable, AI-driven *Continuous Threat Exposure Management* (CTEM) platform, SAMI to OCI and Autnhive clients worldwide. Additionally, Autnhive has been selected to join Oracle's Enhanced Partner program to further enhance its ability to deliver value to joint Oracle & Autnhive customers.

SAMI is an AI-driven Continuous Threat Exposure Management (CTEM) platform designed to help organizations identify, prioritize, and address security risks across complex IT, OT and AI system to deliver consistent performance for AI-driven CTEM workloads. Autnhive has enhanced its capabilities to protect AI systems with its comprehensive Firewall to protect Artificial Intelligence platforms.

Autnhive will leverage OCI AI infrastructure, including low-latency networking, high-performance storage, cost efficiency, and access to the latest GPUs. Running SAMI on OCI will enable Autnhive to access the latest GPU capabilities, lower and more predictable infrastructure run rates, global pricing parity, and operational simplicity.

OCI's modern cloud architecture, such as Oracle Container Engine for Kubernetes (OKE), non-blocking networking, off-box virtualization, were key drivers in Autnhive's decision to run SAMI on OCI.

“By combining Oracle’s advanced cloud and GPU infrastructure with SAMI’s CTEM capabilities, through a coordinated go-to-market strategy, we’re enabling joint customers to build and secure AI systems at scale, without compromise”. said Devi Narayan, Chief Executive Officer, Autnhive.
“Participation in Oracle’s partner program reinforces our commitment to delivering the broadest and deepest CTEM platform for our joint customers.”

“Enterprises today need effective AI security solutions that help address real-world challenges and support business growth,” said David Hicks, group vice president, ISV Ecosystem, Oracle North America. **“Working with Autnhive, we help make it easier for our joint customers to leverage OCI to run and scale AI-driven workloads securely with SAMI.”**

About Autnhive

Autnhive, is a global leader in *Continuous Threat Exposure Management* (CTEM) through its flagship platform, SAMI (Security Assisted by Machine Intelligence). The Company’s mission is to deliver the most trusted and complete proactive security technology, empowering organizations to protect their entire digital stack across every layer of their operations.

Autnhive is pioneering the next generation of autonomous security operations. With offices in the U.S., Canada, and India and operations across North America, Latin America, Southeast Asia, Europe, and the Middle East, Autnhive enables the world’s leading organizations to simplify and strengthen their cybersecurity posture.
